

Card 26: Trachoma transmission modes

QUESTIONS

Q1: What do you see on these images?

Q2: What do you think about these images?

KEY MESSAGES TO REMEMBER

M1: Trachoma can spread from a sick person to another by:

- Piece of cloth used to clean the face of a sick person
- Flies transporting eye secretions of a sick person to another healthy person
- Hands when we rub our eyes and we do not wash them.

M2: Let's always go to the health center in case of trachoma signs
